

Money that *lives* in your texts.

We put money in the chats people already live in. No new app, no wallet, no crypto explainer. Text Stablemate and the transfer happens, to anyone, anywhere. The rails underneath are local stablecoins; the person sending never has to know that.

25+

local stablecoins live on Base

\$857B

sent across borders every year

6.36%

average fee to send money home

THE PRODUCT

A local number.
A global account.

One Stablemate number per country, each backed by a local issuer. Singapore talks SGD, Indonesia IDR, Malaysia MYR. We own the messaging; the partner owns the local currency, the licence and the banking. The account behind the number reaches any phone on earth: XSGD in, IDRX out, auto-converted on arrival.

A MONEY NETWORK ACROSS APAC

Every country is licensing its own stablecoin, and each one is an island. We own the messaging, the local issuer owns the currency, and together that is one network.

CONNECT IN

One issuer per country

USDC · IDRX · XSGD · MYRC · JPYC

They own the currency

Licence, banks, mint and redeem. We never hold local funds

STABLEMATE · THE NETWORK LAYER

Number layer

One in-country number per market, via Photon

Account layer

One Stablemate Account per phone number. Sends and receives land as text

Routing layer

Settlement and auto-swap on Base; the licensed ramp does the regulated leg

REACH

iMessage · WhatsApp

BUSINESS MODEL

0.42%

On every auto-conversion into the local coin. Scales with corridor volume.

The float

A cut of user yield on idle balances held across the network.

Pre-revenue today. The first paying corridor lands with this pre-seed.

WHY A NETWORK WINS

Most people will never mint a stablecoin. They will text. The issuer behind our number in a market gets every user in it, and each node signed makes the next worth more.

TEAM

FOUNDER & CEO

Matthew Meakin

Built the Base Event Agents at Basecamp and DevConnect. Owns narrative, GTM and Base relationships.

CO-FOUNDER & CTO

Risavdeb Petra

Full-stack engineer building on Base since its earliest days. Owns the rail, the wallets and the onchain integrations.

CO-FOUNDER & ENGINEER

Aritra Roy

Backend and systems engineer building scalable, real-world software.

CO-FOUNDER & CBO

Michael Gale

Two startups built and exited. Onchain full-time since 2021. Growth and partnerships.

Raising a \$500k pre-seed to bring the first node online.

Singapore ⇌ Indonesia, money moving both ways on a licensed rail, plus the partnerships signed for the nodes after it.

12 months of runway → corridor live by end of year · 10k users on the network · nodes three and four signed

USE OF FUNDS · 12 MONTHS

On the ground · the team in Singapore and Jakarta, building the corridor alongside the local operators

Partnerships · closing the node partners already in talks

Legal & compliance · node agreements, audits and security review

Number inventory · Photon numbers across the first five markets
